

Terminals

Rail Mounted Terminal Blocks

Application:

Terminal blocks in the proven rail mounted design especially suited for those applications where a lot of terminals have to be fitted in a limited space..

Construction:

- Body in durable thermosetting material
- Design will prevent accidental short circuit.
- Terminal width of 5 mm allows maximum number of connections in a given space.
- Captive screws for easy assembly
- Can be ordered together with a mounting kit containing all required mounting components.
- Original thermocouple material strips
- Can be used with the terminal lugs series A-20.131 and A-20.132

Wire size:

- Accepts wires from 0,5² to 2,5²

Temperature rating:

- 130 Deg. C Max.

Identification:

- Mounting kit contains numbering and polarity stickers. Upon request special colorcoded stickers can be supplied.

Contact Material	Fe	NiCr	Cu	Co	NiAl	Alloy#11
Calibration Code	JP	KP	TP/RP	JN/EN/TN	KN	RN

01-08-07

Mounting kit Part number: A-20.169-1

Mounting kits contains all components required for mounting and properly coding up to a maximum of 10 circuits.

Mounting kit consists:

- Rail 200 mm long
- Endplate
- Two end stops
- Circuit identification 1 thru 25

For terminal blocks over 10 circuits please contact factory

Hamitherm BV – PO Box 433 – 2100 AK Heemstede – The Netherlands.
